## Spotlight on These New Additions...

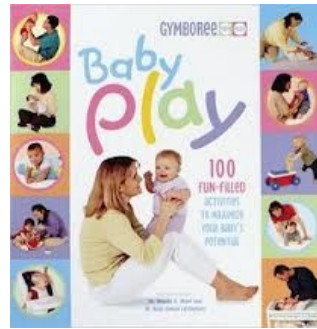

Great Books and Videos

"If you have a garden and a library, you have everything you need."  
- Cicero

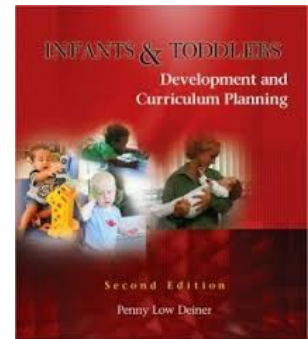

**Ten things every child needs for the best start in life! (1999)**

"Can a child's IQ be improved during the first years of life? Researchers say yes, if the child receives ten simple things show to help children's brains develop. *Ten things every child needs* explains how our earliest interactions influence a child's brain development. Host by popular television personality Tim Reid, *Ten things every child needs* is an invaluable guide that parents and caregivers can follow to give a child his or her best start in life."

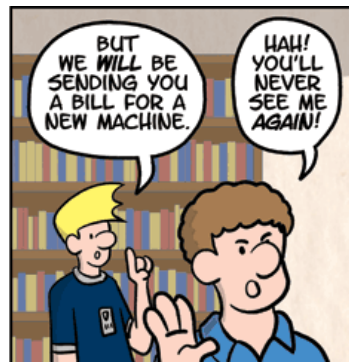

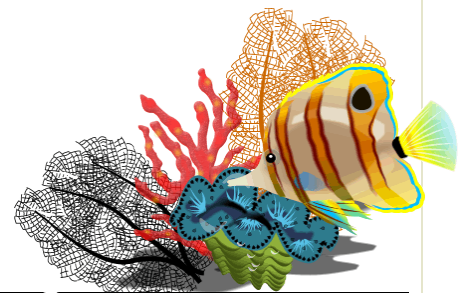

**Baby Play: 100 fun-filled activities to maximize your baby's potential (2001)**

"Sharing play time with infants is one of the best ways to give them a great start in life—and *Baby Play* can help. Full of simple activities that you and your baby can do together, *Baby Play* provides the inspiration you need to get your child excited about discovery and play. Each activity, game, song, and chant has been devised by child-development experts for you and your baby to enjoy together at home or on the go."

**Infants & Toddlers: Development and Curriculum Planning 2nd ed. (2009)**

"I am impressed with the inclusion and coverage of the topics I must cover in my course. I have had difficulty in the past finding a text that provided a balance of information about historical context, prenatal development and childbirth, and comprehensive infant and toddler development paired with practical application."

## Spotlight on These New Additions...

**Great Books and Videos**

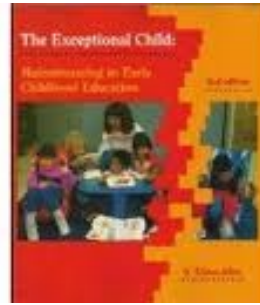

“A great library contains the diary of the human race.”

~George Mercer Dawson

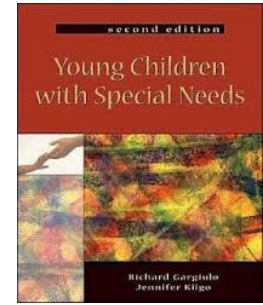

**IMPACT: A Functional Curriculum Handbook for Student with Moderate to Severe Disabilities (1989)**

“The kind of integration of science and practice represented by the *IMPACT* curriculum provides an outstanding model for the next step in our efforts to meet the needs of person with moderate to severe disabilities in a manner that does not sacrifice their quality of life in the process.”

**The Exceptional Child: Mainstreaming in Early Childhood Education 2nd ed. (1992)**

“This up-to-the-minute book provides that knowledge and skills that early childhood teachers, assistants, and aides need to meet the new legislation (P.L. 99-457) which requires *all* states to serve *all* developmentally delayed and disabled preschoolers. The book contains sections that cover all the requirements in detail, including working with comprehensive family services, case management procedures, and the inter/multidisciplinary approach to early intervention.”

**Young Children with Special Needs 2nd ed. (2005)**

“The topic of this book is children from birth through age eight; youngsters generally referred to as infants, toddlers, preschoolers, and early primary students. However, we will focus on a unique group of these individuals—some of whom have been identified as having disabilities, others who may be delayed in their development, as well as youngsters who might be at -risk for problems in learning and development due to exposure to adverse genetic, biological or environmental conditions.”

**News  
and  
Events**

"A good library will never be too neat, or too dusty, because somebody will always be in it, taking books off the shelves and staying up late reading them."

- Lemony Snicket

The **137th AAIDD Annual Meeting, Race to Catch the Future**, will provide researchers, clinicians, practitioners, educators, policymakers, local, state and federal agencies, and advocates with cutting edge research, effective practices, and valuable information on important policy initiatives.

The conference will be held at the Wyndham Grand Pittsburgh Downtown.

- See the original "Pete Goes to Pittsburgh" Video [here!](#)
- See Pete's reminder message [here](#).
- Download the conference app [aidd.bloodhound.com](http://aidd.bloodhound.com) today!
- Learn more about our [Social Media Challenge](#).
- [Continuing education](#) (psychology and social work) is available for pre- and post- conference sessions.

**—About the Library—**

The library is a collaborative effort between BabyNet/South Carolina Department of Health and Environmental Control, the Center for Disability Resources, the South Carolina Department of Disabilities and Special Needs, and the University of South Carolina School of Medicine Library. The CDR Library consists of books, videos, brochures, and audiotapes covering a variety of disability-related topics. The Center for Disability Resources Library is located within the University of South Carolina School of Medicine Library on Garners Ferry Road.
