### It's So Much Work to Be Your Friend (2005)

— Wonderful DVD full of common sense principles to help explain why children with learning difficulties also have social difficulties and the overlaps. This is for parents, teachers, friends and family as it makes understandable some common behaviour issues and offers good advice and understanding!

### The Motivation Breakthrough (2008)

— Motivation is the key to learning. But very few parents and teachers have an effective arsenal of techniques at their disposal. With empathy and understanding, backed by decades of experience in the classroom, Rick Lavoie gives parents and teachers the key to unlock any child's enthusiasm and responsiveness. The Motivation Breakthrough will revolutionize the way parents, teachers, and professionals reach out to and motivate all children.

### Learning Disabilities A-Z (1999)

—This essential guide for parents of children with learning disabilities includes special techniques for detecting disabilities at an early stage, finding causes of learning disabilities, and developing effective educational programs for children with special needs. The authors focus on honing the child's strength rather than dwelling on weaknesses. They offer useful strategies for working with children and provide resources to meet teachers' and parents' needs.
