### Developing Talents: Careers for Individuals with Asperger Syndrome and High-Functioning Autism (2008)

"This book will be very useful to individuals with Asperger Syndrome or high-functioning autism, and especially valuable to parents and others who inspire to be 'helpers.' Written with clarity and directness, Temple's illustrations from her own youthful experiences are convincing and will inspire hope and impart partial guidance. The book covers all aspects of the search for suitable careers for individuals on the autism spectrum. This is a unique and very important book."

### Good Blood, Bad Blood: Science, Nature, and the Myth of the Kallikaks (2012)

"Good Blood, Bad Blood is a riveting if horrifying account of an American tragedy. This is the most thorough account ever of a woeful chapter in our history. It needs to be told so that we can hear the warning to our own time: Eugenics, under whatever disguise, is a crime against humanity."

### Backyards and Butterflies: Ways to Include Children with Disabilities in Outdoor Activities (1993)

"This book was written by four mothers sitting around a kitchen table. Besides being mothers, we are also a developmental psychologist, an occupational therapist, a special educator and an illustrator. Most of the ideas in the book have been thought of, and made, by parents. Others have been made by us, for children we've worked with. This book is for children. This book is for parents. This book is for families."

## Spotlight on These New Additions...

### Health Promotion for Persons with Intellect- ual and Developmen- tal Disabilities (2005)

"This key report summarizes current research on 14 topics affecting the health and well being of persons with intellectual and developmental disabilities. The book provides a solid foundation for developing interventions and solutions to eliminate health disparities among persons with intellectual disabilities."

### SenseAble Strategies: Including Diverse Learn- ers Through Multisen- sory Strategies (1998)

"Every day, teachers are faced with classes of students who demonstrate learning in a wide variety of ways. This book helps meet the challenge of this diversity of learning styles with classroom-tested, easy-to-implement methods for teaching through the four modalities (visual, auditory, tactile, and kinesthetic), paying special attention to the often-underutilized tactile and kinesthetic modalities."

### South Carolina's Infant & Toddler Guidelines: Early Experiences Last a Lifetime (2008)

"These guidelines are meant to be the critical first step in ensuring that all of South Carolina's children, birth to three, have responsive, reciprocal and respectful care. It is our hope that, as a result of the care, children will be ready for school and for a productive adulthood. These Infant and Toddler Guidelines are meant for three diverse yet critically important groups of people in the lives of infants and toddlers: parents and families, providers, and policy makers."

### Provider of Online Courses Agrees to Make Its Website Accessible to People with Disabilities

The U.S. Department of Justice has reached an agreement with edX Inc. to settle alleged violations of the Americans with Disabilities Act. The online education and training provider has agreed to make its website and mobile applications fully accessible to people with disabilities, including those who have vision, hearing or physical disabilities. edX was created by the Massachusetts Institute of Technology and Harvard University as a nonprofit platform for select universities to offer free online courses.

**BRAIN INJURY  
ASSOCIATION**  
OF SOUTH CAROLINA

## **Brain Injury Association of South Carolina is excited to announce that their office will be moving!**

Effective Monday, May 4, 2015, our new office address will be:

**121 Executive Center Drive, Suite 135  
Columbia, SC 29210**

Due to our move, we will have very limited access to phones and emails on Monday and Tuesday, May 4-5. We should have full availability of phones and emails on Wednesday, May 6. We apologize for any inconvenience and greatly appreciate your understanding.

### **—About the Library—**

The library is a collaborative effort between BabyNet/South Carolina Department of Health and Environmental Control, the Center for Disability Resources, the South Carolina Department of Disabilities and Special Needs, and the University of South Carolina School of Medicine Library. The CDR Library consists of books, videos, brochures, and audiotapes covering a variety of disability-related topics. The Center for Disability Resources Library is located within the University of South Carolina School of Medicine Library on Garners Ferry Road.
