

*for Families*

**BabyNet is excited to introduce our new data system-- BRIDGES!!**

BRIDGES is an online system. It will store all child BabyNet program information. BRIDGES will be your child's main BabyNet record. BabyNet family members will be able to:

- view and inspect a child's record
- receive a copy of all screenings, assessment, or evaluation results
- receive a copy of each Individualized Family Service Plan (IFSP)
- receive a copy of a child's service notes or other selected parts of the child's record
- request and receive hard copies of a child's record no more than 10 days from the date of your initial request

BRIDGES will help with keeping a child's record private and secure!!
