

Adding ClinicalKey Images to PowerPoint

ClinicalKey has millions of images available to download to enhance your lectures. Using ClinicalKey's Presentation Maker, you can quickly import ClinicalKey images (including citation information) into your own PowerPoint presentations.

Create a Personal Account

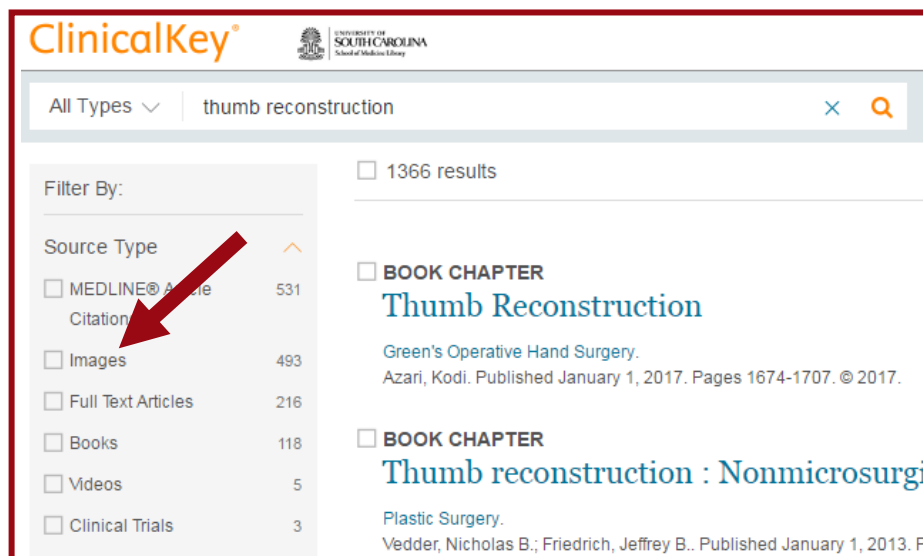

In order to use the Presentation Maker feature, you need to create a free Personal Account.

1. Access [ClinicalKey](#).
2. Select **"Register"** in the upper right corner. (Select **"Login"** if you already have an account.)
3. Fill out the form to create your free username and password.

Exporting an Image

1. After you are logged into your Personal Account, search ClinicalKey to locate an image you want to use.

Tip: On the search results screen, you can select **"Images"** in the **Filter By** box to narrow your search results to just images.

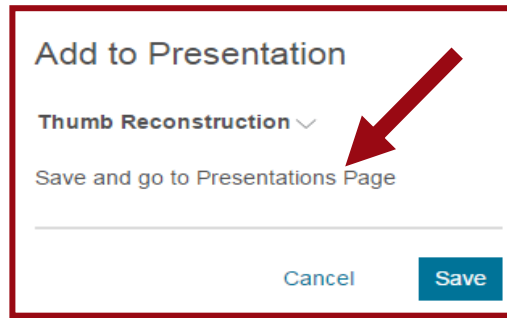

2. Once you locate an image, select the **"Add to Presentation"** icon. (It is the second icon listed.)

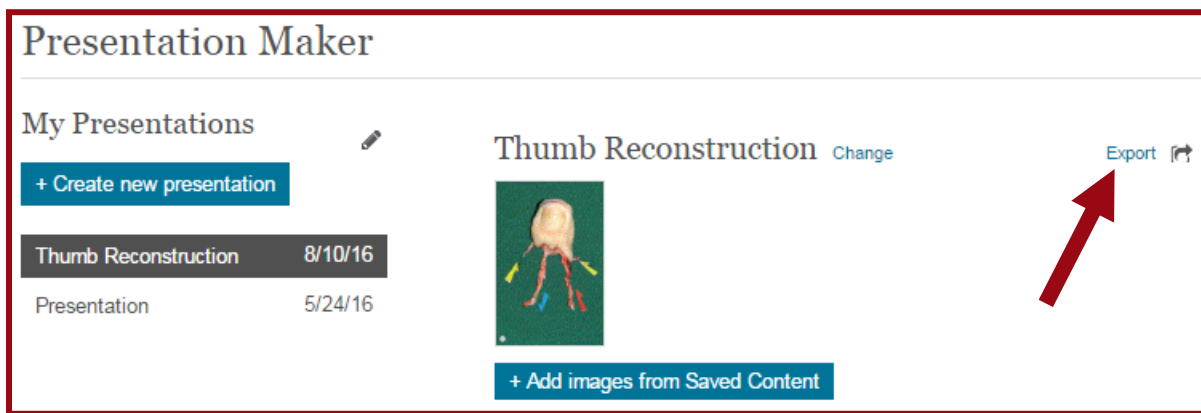

3. The **Add to Presentation** pop-up window appears. Using the Select Presentation drop-down menu, select **"Create new presentation."**

4. Enter a name for your presentation and select **“Add.”**
5. Select the link to **“Save and go to Presentations Page.”**

6. On the Presentation Maker page, select the **Export** link on the right side of the page.

7. PowerPoint opens with a slide that includes your image and citation/copyright information. (Depending on which browser you use, PowerPoint may also appear as a minimized icon on the lower left corner of your screen.)
