

## Fellows and Residents as Teachers (FRATs)

Congratulations! You are now a “FRAT”. And yes, this is a rather special fraternity of teachers and learners. You are critical to the educational success of your program in developing a multitude of learners. The FRATs seminar series is designed to be interactive and give you opportunity to practice and explore concepts between sessions. Expected outside reading is minimal. If you are unable to attend a session for any reason, please advise your Program Coordinator in advance. Appropriate make-up sessions will be provided as we are able.

**Learning Outcomes:** Following these sessions, participants will be better equipped to:

1. Partner with learners to provide education that is “learner-centered”
2. Use teachable moments during clinical care situations
3. Give specific behaviorally-based feedback on performance and learning

Session I:

- Needs Assessment – Your Opportunities and Challenges
- Expectations of You as a Teacher
- Introduction of a Teaching Model

Session II:

- Revisiting the Teaching Model
- Exploring Clinical Teaching Methods
- Improving Feedback Skills

Session III:

- Taking Your Teaching Skills Further

.....

Above is one example of the course content for a series. Each series is done in collaboration with the Office of Medical Education at Prisma Health Midlands (the GME office) and with a tailored design to meet the needs of your residents or fellows. Call or email today to request a consultation for course planning.

OCPDSA – (803) 434-4211
